A brief description of the project:

The project covers measures for the integration of third country nationals (TCN), incl. persons, searching international protection/persons, received international protection (PSIP/PRIP), going beyond providing only their participation in the labour market and the acquisition of the language of the host country. The measures for the integration, included in the project are engaged with the lifestyle of the Bulgarian society and reveal the possibilities and the potential of the third country national to realize personal projects of employment and entrepreneurship as well as providing administrative and legal consultations on the promotion of entrepreneurship, which is a prerequisite for effective and sustainable integration. In addition to that, we have planned measures, reassuring the interaction with the host society by joint cultural initiatives as well as measures for the struggle against the prejudices and the stereotypes of the host society by organizing national campaign in order to raise the awareness of the host society for its benefits from the integration of the third country nationals.

The mentioned measures are supposed to happen by six key activities. You may receive information about them on the project's internet page: ***www.projecta-org.eu***

The project started on 27.05.2019 and will end on 27.11.2021. As a third country national you may enter into the project during this period and take the advantage of the proposed integration measures.

If you are a third country national, out of the EU:

"A chart for skills, interests and potential for development" has been established by a scientific expert group in regard of the fulfilment of the Action 2 *"Activities, directed to early estimation of the specific skills, interests and the potential of the newly arrived TCN for the development of personal employment projects, incl. entrepreneurship with the main aim – the determination of the possibilities/scenarios for their involvement on the labour market"*. The chart is a kind of a questionnaire, aiming to define the specific skills, interests and potential of the newly arrived TCN for the realization of their personal employment projects, incl. also entrepreneurship.

The chart is addressed to the target groups of the project, more particularly to:

- TCNs, staying legally in Bulgaria and
- TSNs in a process of receiving international protection, incl. PSIP/PRIP.

After completing the questionnaire, in response individual estimation will be prepared for every person in the target. It will determine the possibilities/scenarios for involvement on the labour market and our Expert Manager of TCN's case will contact everyone.
